EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Justin D. Petruzzelli (Reg. # 52,118) on 09 February 2006.

The application has been amended as follows:

DETAILED ACTION

Response to Arguments

2. Applicant's arguments, see pages 9-12 of the Appeal Brief filed 01 December 2005, with respect to the rejections under 35 USC §103(a) listed in items 3-10 of the final rejection mailed 29 June 2005 have been fully considered and are persuasive. The rejections under 35 USC §103(a) listed in items 3-10 of said final rejection have been withdrawn.

Since Lin (US Patent 5,742,703) does not teach that the current pixel which is analyzed in independent claims 1, 13, 20 and 21 is not specifically derived from halftone screen processed data, then Lin does not fully teach "analyzing a current pixel of the halftone processed screen image data to a test criterion to determine if the current pixel is a possible saturated color text image" as recited in independent claim 1; "analyzing a current pixel of the first gray level image data for contrast index" as recited in independent claim 13; "an input to each of said screen processing devices to input image data representing a current gray level pixel; a device for analyzing the current pixel for contrast index" as recited in claim 20; and "blending halftone screen processed gray level image data of the same current pixel to form a blended halftone

screen processed gray level value current pixel" as recited in claim 21.

Allowable Subject Matter

3. Claims 1-8 and 10-24 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art references cited in said final rejection do not fully teach the recited claims, as discussed above in the "Response to Arguments". Furthermore, Examiner has been unable to find additional prior art which anticipates the recited claims and/or renders the recited claims obvious to one of ordinary skill in the art at the time of the invention. Accordingly, claims 1-8 and 10-24 are considered allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
